Are you wasting your time on boring and repetitive work?

Efficient Decision Making using Automation

Robotic Process Automation (RPA) is a key component of any Digital Transformation initiative, driving the following outcomes for your organisation:

- Improved customer engagement as response times are reduced
- Higher productivity as low value, uninteresting tasks are automated
- Process and data error rates virtually eliminated

Using our **EPIC** methodology we can start driving efficiency for you quickly with low risk and costs.

E Explore – $995*

Learn about the fundamentals of automation and how it applies to your business with our one day **EXPLORE** workshop

- Learn Automation Core Concepts
- Build a simple Robot to get hands on experience
- Workshop processes that could be automated in your business

P Prove – $5,995*

Before investing in the software **PROVE** the applicability of the technology to your business by applying it to a real process

- Identify a process that has a high ROI
- Develop a Robot on that real business case
- Prove RPA's value in your environment

I Integrate – from $29,995*

Yielding immediate benefits when you **INTEGRATE** production robots into your organisation

- Acquire and set up your RPA infrastructure
- Deploy Robots to production
- Monitor their performance and delivery to ROI

C Create

Embed Automation in your business as we help you **CREATE** your Centre of Excellence (CoE) and find more applications to drive ROI

- Design the right CoE structure for you
- Build internal capabilities and tools to find cases and build on them
- Empower internal users to create their own automations
